

CarbonSuite successfully implemented for automated CDP Reporting in NetSuite.

BACKGROUND

OSF Digital is a global digital transformation professional services company. Like many companies, in 2023, they had requirements to report Scope 1, 2, & 3 emissions, waste, water, and energy consumption to CDP. OSF was looking for a solution for **automated CDP reporting**, and as a long-time user of NetSuite, they selected CarbonSuite's Built for NetSuite Carbon Accounting SuiteApp.

CHALLENGES

- OSF operates in nearly **30 countries** and required automated CDP reporting for all operational regions.
- OSF required quick implementation to meet **compliance deadlines**.
- OSF wanted the implementation to **limit disturbance** to ongoing operational and financial activities.
- OSF required a partner with **deep understanding of NetSuite** in order to understand and optimize their NetSuite data structure for CDP reporting.

RESULTS

- **Global Coverage:** CarbonSuite leverages industry standard emission factors from numerous regions to help OSF automatically calculate operational emissions - from the US to Romania to Hong Kong to Colombia.
- **Simplified CDP Reporting:** CDP Reporting is a rigorous process that requires lots of data collection and preparation. Using CarbonSuite, OSF was able to use our "CDP Workbook" and dramatically cut down on CDP report preparation time, while improving year over year data quality.
- **Automated in NetSuite:** Using CarbonSuite was a smooth and simple learning curve for OSF. No additional integrations were needed, and they could simply log into NetSuite and use CarbonSuite just like they would another NetSuite module without disrupting other business processes.
- **NetSuite Expertise:** CarbonSuite's deep knowledge of NetSuite was crucial to understand OSF's ERP data structure and quickly implement the solution under a tight timeline. We even use standard NetSuite functionality like Saved Searches and Analytics Workbooks to organize and visualize data for automated CDP Reporting.

"I started working with the CarbonSuite team about a year ago with the intent of simplifying the GHG accounting process and automating calculations to prepare for CDP annual reporting. Over that time, it has been a pleasure to work with the CarbonSuite team. From the outset, their expertise and dedication were evident, providing a **seamless integration experience**."

"If you're seeking a robust, integrated GHG accounting solution within NetSuite, look no further than CarbonSuite. **I would 100% recommend their services** and would not hesitate to collaborate with them again. Their team embodies professionalism, innovation, and genuine care for their clients' success, earning them a well-deserved five-star review. Thank you, CarbonSuite, for making our GHG accounting process a breeze!"
